REQUEST FOR REFUND UNDER 37 C.F.R. 1.26(b)

<p>Mail Stop 16 Director of the US Patent and Trademark Office PO Box 1450 Alexandria, VA 22313-1450</p>	<p>CERTIFICATE OF ELECTRONIC TRANSMISSION I hereby certify that this paper is being electronically transmitted to the United States Patent and Trademark Office on the date shown below. Applicants have reviewed the charges of \$510.00 (2253) for this application which appear on the Deposit Account Statement dated November 2006 (copy attached). It appears that these charges were for a 3-Month Extension for response to an Office Action/Restriction and/or Election Requirement dated January 26, 2006 (copy attached). However, upon review of the January 26, 2006 Office Action/Restriction and/or Election Requirement, it is evident that the response to this action was timely filed. On the page immediately following the cover page of the Office Action it states:

"A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION."

A response to this action was electronically filed on April 24, 2006, as evidenced by the attached Acknowledgement Receipt generated by the USPTO, clearly prior to the 3-month deadline of April 26, 2006.

Therefore, Applicant hereby requests that deposit account 50-0413 be credited in the amount of \$510.00.

Respectfully Submitted:

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17, drawn to rub-rail/bumper structure, classified in class 267, subclass 139.
 - II. Claims 18-20, drawn to method for making a composition containing a phosphorescent material, classified in class 264, subclass 21.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, Invention I presents a rub-rail/bumper structure not having a light source, while Invention II presents a process of making a glow-in-the-dark material (i.e. phosphorescent material). The inventions are different not only because they define unrelated structures with different functions and modes of operation, but also because the process of Invention II could not be used to make the apparatus of Invention 1. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
3. Because these inventions are distinct for the reasons given above and the search required for Group I am not required for Group II, and vice versa, restriction for examination purposes as indicated is proper.
